

[VIRTUAL BIOGRAPHICAL GRAVEYARD AND MEMORIAL SITE]

Abstract

A virtual memorial site available for users to mourn their recently passed loved one, or for a person to enter information about themselves for others to view after they have passed on. The two necessary components of the virtual memorial site are the virtual space for friends and family to post information on the funeral services and visitation, and a space for people to enter autobiographical information about themselves, or letters and information for loved ones after they pass on. Additionally there are cyber cemeteries devoted to particular religions or interests.
